

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended): A grease composition for auxiliary machinery of automobile electrical component, comprising which is characterized by containing
a base oil ~~containing an aromatic ester oil in an amount of 30 % by mass or more based on the whole amount of the base oil;~~ and
a diurea compound, as a thickener, represented by the following general formula in an amount of from 5 to 35 % by mass based on the ~~whole total~~ amount of the grease composition:

R8-NHCONH-R9-NHCONH-R10

(wherein R9 represents an aromatic hydrocarbon group having from 6 to 15 carbon atoms; and R8 and R10, which may be the same or different, each represents an aliphatic hydrocarbon group, an alicyclic hydrocarbon group, or a fused ring);

wherein the base oil contains an aromatic ester oil in an amount of 30 % by mass or more based on the total amount of the base oil, and wherein the base oil has a pour point not higher than -30 °C.
2. (currently amended): The grease composition for auxiliary machinery of automobile electrical component according to claim 1, wherein which is characterized in that the aromatic ester oil is a trimellitic ester oil or a pyromellitic ester oil.

3. (currently amended): The grease composition for auxiliary machinery of automobile electrical component according to claim 2, ~~which is characterized in that in wherein~~ the trimellitic ester oil and the pyromellitic ester oil, a hydrocarbon group to be derived is a hydrocarbon group having from 6 to 10 carbon atoms.

4. (currently amended): The grease composition for auxiliary machinery of automobile electrical component according to claim 1, which further comprises ~~is characterized by containing~~ at least one member of carbon black and carbon nano tube as a conductive powder.

5. (currently amended): The grease composition for auxiliary machinery of automobile electrical component according to claim 1, which further comprises ~~is characterized by containing~~ two or more members selected from rust preventives made of a carboxylic acid or a carboxylate, ester based rust preventives, and amine based rust preventives in an amount of from 0.2 to 10 % by mass in total and from 0.1 to 9.9 % by mass singly based on the total whole ~~total whole~~ amount of the grease composition.

6. (currently amended): A rolling bearing, ~~which comprising~~
an inner race;
an outer race;
is characterized by casing ~~freely rollingly~~ plural rolling elements which are freely rollingly positioned ~~by a cage between the an inner race and an the outer race;~~ and

~~packing the a grease composition for auxiliary machinery of automobile electrical component according to claim 1, which is packed in the rolling bearing therein.~~

7. (currently amended): The rolling bearing according to claim 6, which further comprises ~~is characterized by containing~~ a contact type rubber seal.
